Professional Summary

Motivated and detail-oriented professional with strong technical skills in Python, SQL, Excel, Power BI, and Django. Possess a solid understanding of programming, database management, data processing, cleaning, transformation, and analysis. Familiar with relational databases and version control using Git and GitHub. Strong analytical, problem-solving, debugging, and communication skills, with a willingness to learn new technologies and apply technical knowledge to develop accurate and effective solutions.

Work Experience

HTC Global Services

Apr 2025 – Nov 2025

Data Conversion Specialist – Quality Assurance

- Converted and migrated large volumes of data from source systems to target platforms while ensuring data accuracy and completeness.
- Performed data cleaning, validation, and quality checks to identify and resolve duplicate, missing, and inconsistent records.
- Analyzed and processed business documents and datasets using Excel and internal tools to maintain data integrity and compliance standards.

Technical Skills

- **Programming & Frameworks:** SQL, Python (Pandas, NumPy, Matplotlib), Excel (PivotTables, VLOOKUP / XLOOKUP, Macros), Django (user authentication)
- **Data skills:** Data Cleaning, Data Validation, ETL, Data Visualization, KPI Reporting
- **Databases & SQL:** MySQL, PostgreSQL, Advanced Joins, Subqueries, CTEs, Window Functions
- **Data & BI Tools:** Power BI (DAX, Power Query, Data Modeling), Dashboard Development
- **Version Control:** Git, GitHub

Projects

Financial Performance Dashboard

Tools: Power BI, Power Query, DAX, MS Excel

- Built an interactive Power BI dashboard to track key financial metrics including Revenue, Gross Profit Margin, and YOY Growth.
- Cleaned and transformed multi-source financial transactional datasets using Power Query (ETL processing).
- Utilized DAX to construct custom measures, time-intelligence calculations, and dynamic KPI tracking.

Data Analysis on Sales Dataset

Tools: Python, Pandas, SQL, Excel, Power BI

- Analyzed regional sales trends across multiple product categories using Python-driven exploratory data analysis.
- Handled missing records, structured relational constraints, and isolated outliers using Pandas data cleaning methods.
- Wrote optimized SQL queries using joins and aggregations to audit dataset accuracy prior to visualization.

Licenses & Certifications

- **SQL Certificate** – HackerRank
Issued Jun 2026 | ID: 74D738FEA4BE
- **Python Training** – Besant Tech
Issued Apr 2026 | ID: BFT2443B119
- **Frontend Developer** – Great Learning
Coursework: HTML & CSS

Education

BCA	2021 – 2024
AM Jain College, Chennai	CGPA: 7.79/10
HSC	2020 – 2021
